

Amendments to the Specification:

Please amend the paragraph (section) beginning on page 1, at line 7 as shown below:

This application is a continuation-in-part of U.S. application Serial Number 10/248,953, filed March 5, 2003, now U.S. Patent No. 6,736,229.

Please amend the paragraph (section) beginning on page 11, at line 14 as shown below:

As shown in Figure 8, the bracket 102 is a single structure which is disposed around a ~~parameter~~ perimeter of the fuel cell stack 78. Of course, the fuel cell stack 78 can be mounted to the longitudinal supports 98, 100, or other portions of the vehicle 10, using any device or devices which are effective to maintain the fuel cell stack in the first concavity 80. In the embodiment shown in Figure 8, the bracket 102 is attached to the longitudinal supports 98, 100 with threaded fasteners 104. This configuration provides the advantage of allowing the fuel cell stack 78 to be easily removed for servicing.
